

Silicaid[®] E-20 (E-Series)

Silicone Emulsions

Characteristics:

SILICAID[®] E-20 is a heat stable Silicone Emulsion, which is highly stable even in very low concentrations.

SILICAID[®] E-21, SILICAID[®] E-22, SILICAID[®] E-23 & SILICAID[®] E-60 are based on various higher Silicone fluids.

Applications:

SILICAID[®] E-20 Series main uses:

- * As a mold release in rubber production.
- * As an additive to water-based cleaning products, to improve water repellency and to add gloss.
- * As textile softener.

Product Properties:

Silicaid [®] Type:	E-20	E-21	E-22	E-23	E-60
Supplied as emulsion	35 %	35 %	35 %	10 %	60 %
Appearance	Milky white				
Density (25°C)	Approx. 1.0				
Emulsifier	Non-ionic				
Diluent	Water				

Shelf-Life:

SILICAID[®] E-20 has a shelf life of minimum 6 months if stored in tightly closed original container.

Safety Instruction:

Please consult SILICAID[®] E-20 MSDS

Packaging

Standard: Minibulk 1000l, Drum 200l, Container 25l.

Other sort of packaging can be used in order to meet specific customer requirements
